MINUTES OF MEETING - MARCH 1, 1950

The one hundred and eighty-eighth meeting was held by State Highway Commissioner Spencer Miller, Jr., on Wednesday, March 1, 1950, at 10:30 A.M., with the following staff members present:

E.W. Kilpatrick, C.A. Burn, George Cubberley (for Mr. Reed), A.W. Muir, John W. Aymar, Otto H. Fritzsche, James L. Hays, Frederick Vollmer, A. Lee Grover, Charles A. Hurley, Frank A. Reddan, and Sackett M. Dickinson, Asst. Deputy Attorney General.

Tribute - C.F. Bedwell

(Item 1A) Commissioner Miller requested that as a tribute to the memory of Frank Bedwell the Staff stand for a moment of silent prayer. The Commissioner further directed that a memorial tribute to Mr. Bedwell be included in the minutes of this meeting.As prepared by the Commissioner, the tribute reads as follows:

"The passing of Frank Bedwell, Chief of the Department of Design & Construction, on February 18, 1950, brings to a close the career not only of an able highway engineer, but also a devoted public servant.

Mr. Bedwell joined the staff of the State Highway Department in 1920 when the Department was reorganized and Mr. Thomas Wasser was appointed State Highway Engineer. Mr. Bedwell was then with the Public Service Corporation of New Jersey, where for a decade he had been in the Engineering Department. One of his more important undertakings with the Public Service was the construction of the foundations of their large Newark Terminal on Park Place.

Coming to the State Highway Department thirty years ago, Mr. Bedwell took charge of the Construction Division on the threshold of one of the great periods of road-building in the State's history. In a period of a quarter of a century, upwards of $450,000,000 of public funds were invested in the State Highway System. The nation-wide reputation of New Jersey as the "Good Roads" State owes much to his engineering leadership and service.

During the past seven years, Mr. Bedwell, as Construction Engineer, served in turn as Acting State Highway Engineer and more recently as Chief of the Department of Design and Construction. To each post he brought a wide knowledge of construction and a keen appreciation of the highway needs of the State. In all his three decades of service, his devotion to public duty never faltered nor did he ever compromise the high standards set for the Department. While he might have retired because of impaired health several years ago - and was urged to do so - he preferred to labor on in his chosen calling as Construction Engineer in the State Highway Department. He literally "died in the harness".

As he passes beyond the White Gate, we, who have known and worked with him in the Department, salute his memory as a distinguished highway engineer, a devoted public servant and above all a man who walked humbly with his God.

The regular Schedule of Business was taken up and the Commissioner stated that the items hereinafter listed in these minutes are approved as indicated, the same having been recommended for approval by the various Division Heads, and the State Highway Engineer.

MINUTES OF MEETING - MARCH 15, 1950

The one hundred and eighty-ninth stated meeting was held by State Highway Commissioner Spencer Miller, Jr., on Wednesday, March 15, 1950, at 10:30 A.M., with the following staff members present:

E.W. Kilpatrick, C.A. Burn, Allen Ely (for Mr. Giffin), Frank Harris (for Mr. Reed), Harry D. Robbins, A.W. Muir, John W. Aymar, Fred H. Baumann, Otto H. Fritzsche, James L. Hays, Frederick Vollmer, Charles A. Hurley, Frank A. Reddan, and Sackett M. Dickinson, Asst. Deputy Attorney General.

This approval was given with the understanding that the plans made by the Consultants are prepared on the basis of large contracts, and that the Department may need to break these plans up into smaller construction sections to meet the funds that may be appropriated from time to time, and also that some revisions of the plans may be necessary when this break-up is made.

Helfrich, Sr., of Pleasantville, New Jersey.

Railroad Underpass at Alpha ✓

(Item 6) The Commissioner authorized the placing of advertisements for bids to be received on March 30, 1950 for construction of the Railroad Underpass at Alpha, Warren County, Federal Aid Secondary Project S-86(2), the plans and specifications having been approved by the District Engineer of the Bureau of Public Roads.

It is further understood that the actual installation will be made by local contract forces subject to approval of the contract prices for labor and equipment provided they are less than the estimated costs of such labor and equipment if these installations were made by the Department forces. The Commissioner further determined that such an agreement with the Town of Hackettstown will be executed on behalf of the State Highway Department when signed by the proper officials of the Town and approved by the Attorney General.

Regulations - State Highway Contracts

(Item 1A) The Commissioner presented four letters received by him from H.J. Connelly, General Manager of the Associated General Contractors of New Jersey, with suggestions which it was felt would improve operating conditions in the performance of State Highway contracts as follows: - 1. Delay in obtaining payment of final estimates on contracts which have been completed. 2. Incorporating a clause in the specifications to afford the contractor protection for washouts or other damage to his job over which he has no control. 3. Revising the provisions of the specifications to conform to the Federal regulations which confine an increase or decrease in the contract to 25% of any one unit. 4. Suggestion that no additional deductions be made for retained percentage after 50% of the contract has been completed, provided the engineer in charge of the work is satisfied with the progress being made. Following a discussion of these subjects by the staff, Commissioner Abbott advised that he was referring same to State Highway Engineer Kilpatrick for further study with officials of the State Highway Department, and the preparation of proper replies when a determination is made as to the possibility of adoption of these suggestions.

SCHEDULE OF BUSINESS - FEBRUARY 15, 1951

Administration - Claims Item

Accounting - Claims

1. This claim arises out of an accident occurring on State Highway Route 25, Elizabeth, New Jersey, on September 24, 1950, involving a vehicle owned and operated by Thomas P. Giardino. As the result of the aforesaid accident, Departmental barricade was damaged and had to be repaired at a cost of $47.20. The debtor, upon receipt of the Department's bill, advised that he was in very poor financial circumstances and at the time of the accident carried no insurance on his vehicle. The Elizabeth Police who covered the accident, indicated in their report that the debtor's vehicle was cut off by an unindentified car causing him to swerve to his left to avoid a collision with said car and resulted in his striking the wooden barricade. There were no witnesses to the a cident and no charges were preferred against Mr. Giardino by the Elizabeth Police. The debtor, in order to dispose of the Department's claim amicably, has offered the sum of $45.00 in full settlement. In view of the debtor's apparent concientious effort to satsify this obligation to the best of his financial ability, and giving due consideration to the circumstances under which the a ccident occurred, it is considered the Department would be justified in accepting the offer of $45.00 in full settlement of its claim, and cancelling the balance of the claim in the amount of $12.00. Such settlement is therefore recommended in accordance wi th Mr. Levine's report, and the recommendation of Sackett M. Dickinson, Assistant Deputy Attorney General.

(1) State to negotiate, make searches and acquire property in the name of the State or its assignee - and deed to the City the portions of the properties acquired as are necessary for the City Park;
(2) The City to contribute toward the total cost of acquisition a lump sum of $300,000.00 to be placed in escrow and paid to the State from time to time as conveyances are made;
(3) In the event that any parcel cannot be acquired by agreement, the State or the City will condemn such portions as are required for their respective purposes.

The City's contribution of $300,000.00 plus City-owned property estimated to be worth $34,729.00 (which will be absorbed in the entire project between Albany & Clinton Streets) or a total contribution of $334,729.00 toward the total estimated cost of $1,794,946.00 for the entire project is considered fair and reasonable, in view of the probability that, without the City's participation, the State's total cost would materially exceed its proportionate share of $1,421,445 on an area basis.

This agreement having been fully executed on behalf of both parties as of April 3, 1951, andit being considered a mutually satisfactory and advantageous agreement for both parties, it is recommended that this agreement be ratified.

Respectfully submitted,

2. Approval and execution is recommended of agreement with the Board of Chosen Freeholders of Ocean County covering understandings in connection with the improvement of the intersection of Hooper Avenue and Route 37 in Dover Township, Ocean County, to relieve the traffic hazard by eliminating and transposing the traffic flow on Cedar Grove Road to a more nearly right angle intersection with Hooper Avenue. The County agrees (a) to acquire the necessary right of way for the relocation of a part of Cedar Grove Road, without cost to the State; (b) abandon or vacate the part of Cedar Grove Road no longer required; (c) perform necessary engineering, prepare plans and specifications, advertise for bids and award the contract, all subject to the approval of the State. The State agrees to reimburse the County for the cost of the construction work, engineering and pertinent contingencies. The estimated cost of this project, exclusive of the right of way to be acquired by the County, is $14,000, and it is recommended that this amount be set up from the Miscellaneous Construction and Purchase of Right of Way account.

It is recommended that this project be accepted by the State Highway Commissioner and that final payment be authorized upon completion of necessary formalities.

Agreements - Highway Lighting Service

4. There is presented report from the Electrical Division, together with an agreement, in duplicate, between this Department and the Rockland Electric Company covering maintenance andoperation of highway lighting units operated by this Department within the territory of that Company. This agreement will cover a period of five years beginning on May 1, 1951, renewing a similar agreement which expires on that date, and there will be no change in the State's cost for the lighting services covered. Right of Way - Route 42

6. There is presented General Property Parcel Map on Route 42, Section 12 (North-South Freeway), Morgan Boulevard to Route 45, together with memoranda from Mr. H.W. Giffin, Chief, Department Design & Construction, and Mr. C.A. Burn, Assistant State Highway Engineer. It is recommended that this key map be approved subject to such changes as may be necessary in order to conform with the construction plans as finally adopted and approved. There is about a score of houses between the main and south branches of Newton Creek in Gloucester Heights, shown on Sheets 2,3 & 4, which are subject to an ordinance compelling the owners to connect with a new sewer system. The City will be requested to exempt these properties from the operation of the ordinance because the State intends to acquire the properties in the very near future. The estimated cost of the right of way as shown on Sheets 2,3 & 4 is $300,000. The estimated cost of the right of way for the entire section is $650,000. Authority is requested to set up $100,000 of this amount to negotiate for properties considered necessary to be ac uired at this time to forestall development and improvements.

Subsequently the owner, through her attorney, has requested that the State reset an additional 200 feet of fence. We find that a gap in the fence was left to provide access for the contractor. Therefore the owner's request is fair. The owner will provide the necessary posts and wife, and our Maintenance Division estimates it would cost approximately $60 to erect the fence. It is recommended that the Maintenance Division be authorized to erect this portion of fence and that the cost thereof be charged to the Office of Right of Way Purchases.

Condemnation proceedings were previously authorized for the acquisition of Parcels R1A & R1B, George and Charles Wiedenmann, at which time the owners' demand greatly exceeded our appraisals. Subsequently, the plan was changed to further improve the intersection, which involved the acquisition of an additional 3,500 square feet. An agreement has been executed and submitted covering Parcels R1A, 2R-1B & X2R-1B - consideration $33,000.00 - State to perform certain work items estimated not to exceed a cost of $500.00; Steps of Red Hill Inn building to be allowed to remain in their present location for the life of the building; owner to reestablish water supply at his own expense. Demolition of the distillery building and adjoining small outbuildings will be included in the road construction contract. This project is urgent and our engineers require the prompt removal of the distillery building. It is, therefore, recommended that the agreement be approved, and that condemnation proceedings previously authorized for Parcels R1A & R1B be discontinued.

Lafayette Blvd. & John Fitch Way

3. Under date of February 15, 1951, semi-final acceptance was made of the A.J. Cunningham & Sons' contract for the Pavement Widening on Lafayette Boulevard and John Fitch Way, from Calhoun Street to Ferry Street, City of Trenton, Mercer County, N.J. The contract was finally completed as of June 13, 1951, and it is recommended that this project be accepted and final payment authorized when the necessary formalities have been observed. By agreement dated September 12, 1950, the City of Trenton is to maintain streets, connections and intersections. Accepted by City of Trenton resolution dated January 25, 1951.

Utilities - Route S3, Rutherford Borough

4. On August 15, 1946, approval was given by the State Highway Commissioner of making reimbursement to the Bell Telephone Company for the actual cost of rearranging their underground facilities to accommodate the construction of bridges to carry Ridge Road and Park Avenue, in the Borough of Rutherford, Bergen County, over Route S3, which work was estimated to cost $10,578.87. The actual cost of the work amounted to $22,272.90. It develops that the estimate was entirely too low even for 1946, with no item being included for use of motor vehicle equipment, and this, together with the rising prices since that time forlabor, material, equipment, and contract work accounted for the unusually large overrun for this work, which was completed in 1948. It is recommended that the company be reimbursed for the actual cost of the work in the amount of $22,272.90.

"No Passing Zone" - Route 28

5. Approval is recommended of resolution establishing "No Passing Zone" on State Highway Route 28, formerly Route 9, also known as Route U.S. 46, through the Town of Clinton and adjacent thereto in the Township of Union to the west and the Township of Clinton to the east, in Hunterdon County, in accordance with the provisions of Paragraph 114 of Chapter 25 P.L. 1951.
